

DoorTek Continues To Build On A Legacy Of Powerful Software Platforms

The decades of development that has gone into the DoorTek-IS software shows in the rich set of features, drivers and integration interface options that are offered. Our software is one of the reasons we can

be so confident in promising to find a solution for your security needs. You will never encounter a situation where you have to limit your requirements or compromise your security to fit the products we provide.

Our entry level software, **DoorTek-IS Core** is ideal for *small to medium* access control projects and provides a cost-effective solution that is easy to use and fully expandable to meet your evolving needs. Enhanced features like photo badging, video integration and reader expansion modules can be added as needed allowing you to only pay what you need.

Create a display and control environment that is intuitive, informative and uniquely-suited to your requirements.
